Subject: MICROSOFT SETTLEMENT

Judge;

Please ensure that the rule of law extends even to the richest and most powerful in our great country.

Even in the past few months, as the DoJ has essentially let Microsoft entirely off the hook, they have begun to exercise their monopoly powers in a way that is actually scary (have you seen the new XP release and the Passport junk that you just cannot get away from therein??).

The entire US software industry is depending on you.

Thank you.
